Address:  Bellville
7530

Gender: Male

## OBJECTIVE

Aspiring software engineer and current coding bootcamp student with a strong foundation in programming fundamentals, web development, and database management. Eager to apply newly acquired technical skills in a real-world environment while contributing to innovative projects. Passionate about technology, problem-solving, and continuous learning, with a long-term goal of becoming a full-stack developer in a collaborative and growth-oriented team.

## EDUCATION

**Tertiary Education (Cape Peninsula University of Technology)**
Diploma: Mathematical Sciences (Stream: Science)

## SKILLS DEVELOPMENT

### SOFT AND LIFE SKILLS

**Communication Skills**: Able to clearly convey information both verbally and in writing. Developed through academic presentations, group projects.

**Problem-Solving Skills**: Strong analytical thinker who approaches challenges with logical reasoning. Improved through mathematics, statistics, and coding exercises during university.

**Time Management:** Efficient in prioritizing tasks and meeting deadlines. Balanced academic workload, extracurricular activities like the chess club, and personal study time.

**Teamwork and collaboration:**  Comfortable working in group settings and contributing to team goals. Gained through university group projects and customer service roles requiring coordination with team members.

### SOFTWARE SKILLS

- Microsoft office Tools
- SAS Studio
- R Programming
- SQL
- Python
- HTML&CSS
- JavaScript

## EXTRAMURAL ACTIVITIES

Member of University Chess Club

Active participant in the chess club, where I engage in regular practice sessions, tournaments, and strategy workshops. This has helped me develop critical thinking, focus, and patience.

Math's Peer Support for First-Year Students

Provide academic assistance to first-year students in mathematics, helping them understand key concepts and prepare for assessments.
